Benson, John MD

Blount, Kendra DO

The Breast Health Center at MDI Hospital is Downeast Maine's only Breast Imaging Center of Excellence and one of only six in the State of Maine. To earn this prestigious designation, our team has undergone rigorous breast imaging programs and performed at the highest possible standards as defined by the American College of Radiology.

The Breast Health Center - continued from previous page

In addition to digital mammography, the Center of Excellence status puts a gold star on other types of imaging procedures including breast ultrasound, ultrasound-guided biopsy and stereotactic breast biopsy. In each of these procedures, our team has undergone additional training and education to ensure they are proficient in the most recent developments.

MDI Hospital

Ph: 288-8445

Emergency Room - *continued from previous page*

MDI Hospital's 24-hour Emergency Department provides skilled, compassionate, urgent care for patients suffering from a broad spectrum of illnesses and injuries, from the life-threatening to less severe.

The Hospital's Emergency Department is staffed with a team of nurses, physician assistants, and physicians who are all trained to respond to the multitude of emergency care situations that come through our door. A full-time Hospitalist specializing in the care of inpatients is available to manage the admission of patients should they need further care and evaluation in our Intensive Care or Skilled Rehabilitation Units.

Orthopedic and general surgeons are available should the need arise. Our medical imaging department with state of the art CT and Ultrasound capability provides diagnostic support.

In the busy summer months when tourists arrive, the Emergency Department adds staff to accommodate the increase in patient traffic.

Through real-time, two-way telecommunications technology, our Emergency Department staff can consult with specialists located at other facilities. If the scope of care needed exceeds our resources, our Emergency Department will arrange for prompt transportation to our tertiary care facility in Bangor.

Laboratory

MDI Hospital

Ph: 288-5081 ext. 1359

The MDI Hospital's Laboratory offers a full range of laboratory services performed on state-of-the-art equipment by certified and registered staff. Nearly a quarter of a million tests are performed annually at MDI Hospital.

The Laboratory is linked through a courier system serving the Hospital and Health Centers offering year-round service for transporting specimens, supplies and reports. Most routine test results are available within 24 hours. Inpatient facilities and Health Centers are linked electronically with our information system to expedite test ordering and reporting.

The MDI Hospital's Laboratory is located in the main Hospital building and is open 24 hours a day, 7 days a week, including holidays to meet outpatient, inpatient and emergency needs.

MDI Orthopedics provides general orthopedic surgical services for pediatric to geriatric patients, joint replacement procedures, and sports medicine for recreational and competitive athletes alike.

Our Board Certified Orthopedic Specialists provide state of the art evaluation and treatment of sports injuries, disorders of the joints, bones, and associated muscles as well as surgical and consultative support to our Emergency Department.

Our practice is founded on achieving excellence in orthopedic surgery, demonstrating integrity in our physician-patient relationships, providing prompt service and compassionate care for our patients, and promoting wellness as a priority in life. We strive for teamwork among health care professionals as a means to optimize surgical outcomes.

Surgical Services

MDI Hospital Surgery Clinic
Cooper Gilmore Health Center
Ph: 288-5024

The surgical services department at MDI Hospital provides an array of general, orthopedic, ophthalmologic, urologic, and obstetric/gynecologic surgical procedures.

Expanded surgical options are now through the MDI Hospital Surgical Clinic and General Surgeon Kendra Blount, DO. Dr. Blount is MDI Hospital's newest staff physician and will perform a variety of surgical procedures including cancer care, laparoscopic and general surgery, emergency surgery, and women-specific surgeries.

Our ambulatory care unit provides a comfortable, safe environment in which to prepare for and recover from your surgery. We provide complete post-operative instructions and a follow up calls from our staff to answer questions and to ensure that the recovery is as swift and complete as possible.
